

Grupo Bringel:

An ecosystem of agile and innovative solutions

BRINGEL
GRUPO
INOVAÇÃO E OUSADIA

Maximizing Results is our reason for being.

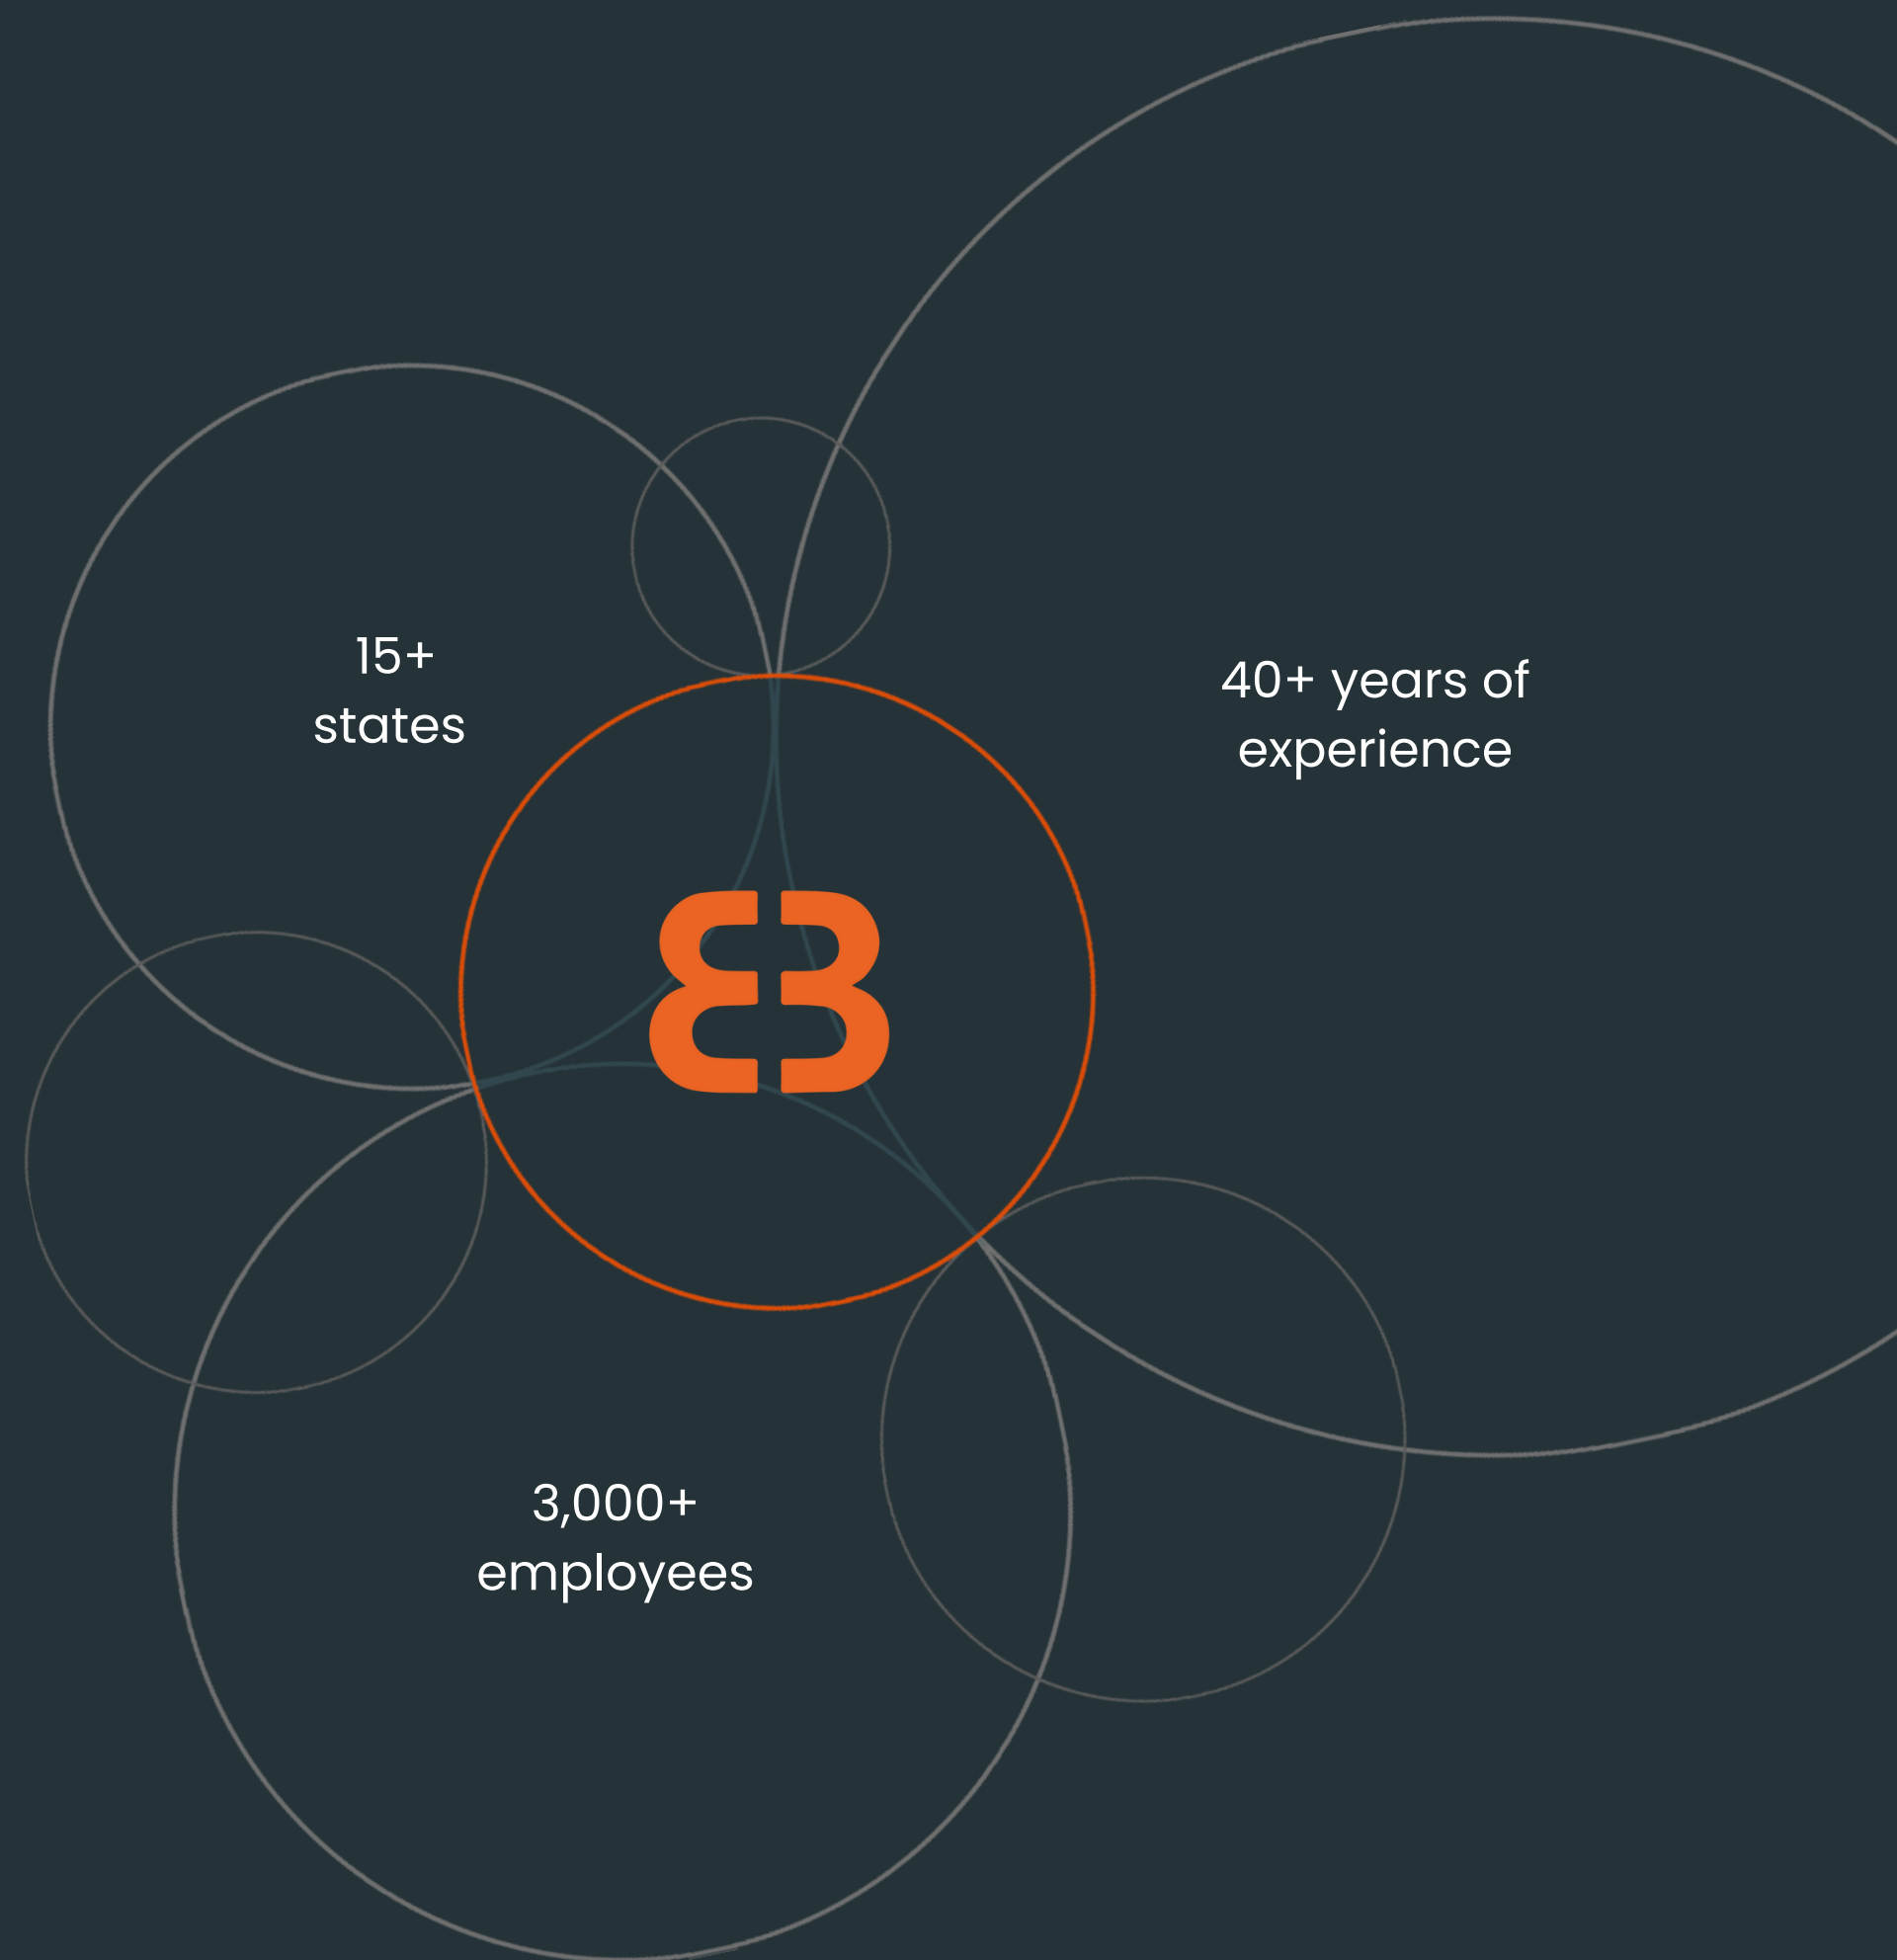

Operational efficiency, agility, and innovation across various sectors:

- Healthcare
- Logistics
- Environment
- Education
- Infrastructure
- Construction
- Technology
- Communication
- Agribusiness

Founded in 1981, the Bringel Group has become a successful reference throughout Brazil.

The Bringel Group is prepared to cross borders and expand globally with innovation and boldness.

We invest in professionals from various fields to bring innovations that impact lives. Our portfolio covers the entire value chain and includes different segments. We are committed to transforming society and making a difference.

Health Ecosystem

The **Bringel Group** stands out for its ability to integrate all these solutions into a comprehensive healthcare ecosystem. With services ranging from the sterilization of hospital materials to laboratory diagnostics, rental of large medical equipment, orthopedic product supply, clinical engineering, and industrial hospital laundry, we provide comprehensive and specialized support to optimize the operations of hospitals and clinics throughout Brazil.

Professional Hygiene and Sterilization for Hospitals and Hotels

Lav Norte is a company specialized in industrial laundry services, focused on providing efficient and safe solutions for hospitals and hotels. With years of market experience, Lav Norte stands out for its advanced technology and rigorous hygiene processes, ensuring the highest safety standards.

Our Differentials:

- **Cutting-Edge Technology:** We use modern equipment that optimizes water and energy consumption.
-
- **Rigorous Quality Control:** We adhere to hospital standards to ensure all laundered items are free of contaminants, meeting the highest criteria for sanitary safety.
-
- **Specialized Service:** Our highly trained team understands the specific needs of each client.
-
- 1. **Punctuality and Efficiency:** Committed to strict deadlines, we ensure the quick delivery of all materials while maintaining quality and safety in our processes

We serve over

90 hospital
networks across Brazil.

Salux Ecosystem

For 25 years, Salux has been developing integrated technological solutions that simplify and optimize hospital and clinic management. Our platform addresses the main challenges faced by healthcare professionals and managers by offering:

Process Optimization: Solutions that save time, allowing a focus on patient care.

Ease of Use: Intuitive tools that streamline daily tasks.

Data Security: Assurance of comprehensive protection for sensitive information.

Solutions in Mobile Units

Athos and **Athos Rental** stand out in the market for their innovative approach to offering mobile healthcare units designed to facilitate access to services across various segments, anywhere. With a strong commitment to quality and efficiency, our solutions meet the demands of the healthcare sector, ensuring that care reaches where it is needed.

Athos: Manufactures customized and permanent mobile units for various segments, allowing companies to acquire units for continuous use and personalization.

Athos Rental: Rents mobile units, making access to services easier without the need for investment in permanent assets, ideal for temporary demands and events.

Both divisions work together to effectively and innovatively serve any segment according to the client's needs.

StarLearning is an advanced knowledge management and continuous training platform focused on the healthcare sector. It provides a customizable, secure, and user-friendly environment designed to enhance training, engagement, and the development of teams.

Features:

- Customizable platform with multi-level management
- Learning paths with multimedia resources
- Global and individual performance indicators

Ponta Negra Logística is a customs port and warehouse located at Joinville Airport (SC). The company also has the Triângulo dry port, which features a facility linked to logistics. This facility is dedicated to the logistics of importing and exporting goods under various customs regimes.

Throughout its journey, Ponta Negra Logística has established itself as a market reference, providing high-quality services and meeting the most demanding needs of its clients.

Differentials:

- **Flexibility:** Adaptation to the specific demands of each client.
-
- **Agility:** Fast processes with three daily parameterizations.
-
- **Security:** Assurance of the integrity of goods during transportation and storage.

Innyx: Innovation in Education

Innyx is a technology-mediated education company specializing in the development of technological solutions for basic and corporate education, operating in various Brazilian states.

The company offers personalized learning experiences and contemporary teaching methodologies, always focused on maximizing results. Among its solutions are an online learning platform, the development of teaching systems, a publishing house and studio, an educational management platform, and products aimed at corporate education, among others.

IEDi: Transforming Education with Innovation

The Institute of Education and Innovation (IEDi) is a dynamic institution focused on providing innovative educational solutions. With a structure that encompasses on-site and distance learning (EAD) degree programs, free courses, and qualification programs for companies and their employees, IEDi is committed to promoting quality education.

Currently, the institution holds the highest rating (5) from the Ministry of Education (MEC), reinforcing its commitment to academic and professional excellence.

Agropecuária Parintins was established with the purpose of transforming agribusiness in the Northern Region, bringing innovation and excellence in animal protein production. With a focus on buffalo, beef cattle, and equines, the company stands out as a leader in the sector, offering sustainable and technological solutions.

With a robust and modern structure, Agropecuária Parintins is preparing to become the largest producer in the region, driving agribusiness and serving as a showcase for Brazil.

Differentials:

- **Technological Innovation:** The first in vitro embryo production laboratory for cattle and buffalo in the North.
- **Production Diversity:** Specialized in beef cattle, buffalo, and horse breeding.
- **Strategic Location:** Located in Rorainópolis, RR, with plans to become the largest producer in the Northern Region.
- **Superior Quality:** Focus on producing animal protein and dairy products with high-quality standards.
- **Sustainability:** Practices aimed at sustainability and efficiency in production.

Bringing Information and Entertainment to All of Brazil

The Grupo Norte de Comunicação (GNC) is a media conglomerate that encompasses television, radio, and a news portal with national coverage. Its brands include TV Norte, an affiliate of SBT, TV Band in Roraima, Rádio Norte FM (95.1 in Manaus and 101.7 in Brasília), and Portal Norte, a news portal with reach across Brazil.

GNC's commitment is to provide credible journalism, relevant programming, and quality entertainment, along with special projects and events that connect the audience. Its goal is to be the primary source of information for those seeking guidance or direction in Brazil.

Differentials of TV Norte Amazonas:

- TV Norte SBT is present in various states across Brazil, with real-time audience measurement.
-
- Rádio Norte FM, a favorite and popular station, is a leader in Manaus, with the frequency 95.1, and is also present in Brasília, with the frequency 101.7, offering diverse and informative programming.
-
- Portal Norte (portalnorte.com.br) has correspondents throughout Brazil, delivering news with speed and accuracy.
-

Integrated Solutions for Waste Management

Norte Ambiental is the largest training center for industrial and healthcare solid waste. The company offers integrated solutions for the management of hazardous waste at every stage of the process, including collection, storage, transportation, and complete destruction through autoclaving and incineration. Its commitment is to ensure environmental protection, the safety of employees, and the health of the population.

Differentials:

- **Largest Training Center:** A reference in training for the handling of industrial and healthcare solid waste.
- **Comprehensive Waste Management:** Collection, storage, transportation, and complete destruction of hazardous waste.
- **Sustainable Processes:** Use of techniques such as autoclaving and incineration to ensure environmental safety and public health.
- **Commitment to Safety and the Environment:** Guaranteeing environmental protection and the well-being of employees and the community.

egSYS: Technological Solutions for Public and Private Security

egSYS is a company with over 15 years of experience in developing integrated solutions for public and private security. Its technologies are utilized by various respected corporations, including Military Police and Fire Departments.

egSYS incorporates artificial intelligence into its solutions, enabling:

- **Data Analysis:** Collecting and analyzing real-time information for strategic decision-making.
- **Facial and License Plate Recognition:** Identifying individuals and vehicles, generating automatic alerts.
- **Dispatch Automation:** Efficiently allocating resources through machine learning.

Offered Solutions:

- **SYSPM:** Emergency response and dispatch system.
- **SYSPM Mobile:** Application that enhances productivity for field teams.
- **SYSPM Gestão:** Strategic management tool for command positions.
- **GUARD SOLUTION:** Functional control at reception and security posts.
- **SYSGM:** Integrated management solution for the operational processes of municipal guards, promoting efficiency and effectiveness in security actions.

Over 15
years of operation.

24-hour
technical support.

Active in more than
7 states
in Brazil.

Let's transform tomorrow together!
Bringel is committed to creating solutions that make a
difference.
